Spring 2025 Schedule

Spring Wednesdays- Nature School

The STEAM School will offer an outdoor education program starting in the fall of 2024. The focus will be on students K-6th grade to develop a lifelong deep and meaningful connection to the natural world. Every week we will meet at different outdoor locations to explore and learn. Being outdoors regularly is a great opportunity for them to take risks, build self-confidence, and learn skills. We plan on having a lot of free time to explore and hike. We will also have activities like; shelter building, making cordage, basket making, plant ID, and water quality testing. Tim MacWelch from Earth-Connection School will be one of the instructors teaching survival skills.

- Wednesday classes will be held at various locations, including parks and private land.
- We ask that the parents remain at the locations and participate.
- Rain or Shine

* locations and times are still being planned and are subject to change
